

AIH/SBN 1980 Editorial Index

INDEX TO FEATURE ARTICLES IN
AUTOMATION IN HOUSING/SYSTEMS
BUILDING NEWS From January 1980
Edition Through December 1980 Edition

KEY: Roman numerals in parentheses in front of each article indicate the type of company covered in the article as follows: (I) - Production Builder; (II) - Panelized Home Manufacturer; (III) - Mobile Home Manufacturer; (IV) Modular Home Manufacturer; and (V) - Component Manufacturer. Some firms are in more than one business, but only main designations are used for the specific feature being covered.

NOTE: Back issues and/or reprints of articles from past editions are sometimes available from AIH/SBN. However, if articles you are requesting are more than six months old, your best bet for copies is to go directly to the AIH/SBN microfilm service which sells copies at nominal cost. The address is: University Microfilms, 300 North Zeeb Road, Ann Arbor, MI 48106. Phone: 313/761-4700.

What Do 35 Successful Component Manufacturers Know That You Should?

THE SCIENCE OF PROFESSIONAL SALESMANSHIP

In Wood Components

It's a fact that you can't save enough to grow in any market condition. You have to sell more. Now you can with the only proven sales training and development program available for truss and wood component sales people. Use it in your own office every day for 42 days of growth and development in sales knowledge, people knowledge, and daily results!

Using "state of the art" television video, audio cassette, and dynamic printed involvement materials, your sales people experience the internal changes necessary to use the training every day with the desire of a champion and the powerful attitude of a sales winner!

CALL OR WRITE - TODAY!

I want to know how this program can help me create more powerful results.

For Housing: You Can Still Buy It ALL AND Pay Less In...

Automation in Housing & SYSTEMS BUILDING NEWS

1. AIH/SBN is the ONLY publica-
tion covering the complete field of
industrialized/manufactured housing in
America with features detailing BOTH
the marketing AND manufacturing of
homes. This field consists of six
segments: (1) Production Builders,
i.e., big home builders who use indus-
trialized housing components like roof
trusses, etc.; (2) Panelized (Prefab)
Home Manufacturers who build in
factories and sell through builder/
dealers; (3) Mobile Home Manufac-
turers; (4) Modular Home Manu-
facturers (they make self-contained
homes in factories); (5) House Com-
ponent Manufacturers (make roof
trusses, etc., primarily for Production
Builders); and (6) Mobile/Modular/
Panelized Builders & Dealers.

2. There are NOT many companies
in industrialized/manufactured housing,
but they include the giants and they
make most of the homes built and
sold each year. AIH/SBN's specially
commissioned continuing telephone
research on the first four categories
listed above reveals this bottom line:
There were 4,983 housing manu-
facturers in America in 1979 operating
from 10,566 factories or locations.
In 1979, these 4,983 companies
built just over 2 million shelter units
(AIH/SBN Jan. 1980 Edition).

3. AIH/SBN is the ONLY publica-
tion which audits its circulation by
SALES DOLLAR VOLUME (BPA)
to help insure that you get the cover-
age of these big companies.

4. It costs LESS THAN HALF
as much to cover the building industry
in AIH/SBN as in any of the all-
industry-and-periphery magazines cir-
culating to the housing field. In place
of two, you could invest in one all-
industry book and AIH/SBN and save
at least 25% on your ad budget while
intensifying your readership.

5. Over 31% of the inquiries you
receive from home manufacturers
for your AIH/SBN advertising prob-
ably will come from a company
whose annual sales are in excess of
\$5 million because that is our BPA
Audited circulation pattern.

If You Have Questions About
The Lucrative Field of Manu-
factured Housing, Call Us Collect
And Ask For Our Media File.

NEW DOUBLE PRE-CUT SAW

ABSOLUTE ACCURACY FOR STEP/REPEAT CUTTING

Idaco Leaver Index/Stop Gauges, standard on the Double Pre-Cut Saw, assure perfect accuracy cut after cut. The specially formed gauge bars are machined and slotted with micrometric exactness and stops are ground to minor tolerances in the thousandths. Quickly and easily set to any lengths, the system eliminates both waste motion and wrong cutting.

**FOR PRECISION CUTTING OF
STUDS · CRIPPLES · TRIMMERS
FIRE BLOCKING · FLOOR JOISTS
AND ALL OTHER DOUBLE END TRIM PARTS**

This new Double Pre-Cut Saw is a great production machine and a major labor-saving unit. Engineered and built to rugged Idaco standards, it handles varying sizes of materials up to 2 x 14 with two pieces going through simultaneously. Full safety features are built in, of course. With a single out-feed, only one stacker is needed to handle the output of two operators. The conveyor system is available in any length to meet the customer's needs. It is a versatile, high performance machine that fits perfectly into most component manufacturing operations. A single pre-cut version is available.

Factory Housing Professionals

Emerging modular and closed-panel producer is seeking highly-qualified managerial and technical people to staff its new plant in a desirable Midwest Suburban Location.

Among specific positions to be filled are:

○Materials/Purchasing Manager.

○Engineering Manager.

○Production Manager.

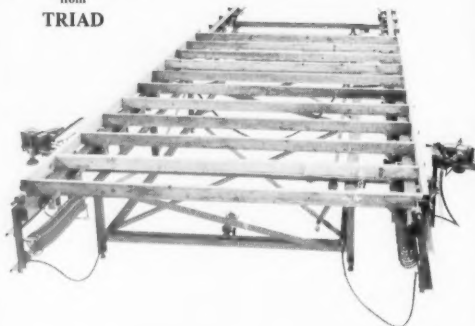

○Controller.

○Plus Other Positions.

These are unique, ground-floor opportunities with a well-financed company with an exciting future.

Please respond with detailed resume to: AIH/SBN, P.O. Box 126, Dept. 12-2, Carpinteria, CA 93013.

NEW! ECON-O-FRAMER from TRIAD

Designed with Triads quiet quality, the Econ-O-Framer is efficient and simple to use. It will reduce time and ensure consistent quality for in-line plant use and is versatile enough for on the job site production. If you depend on quality stud walls, then with the Econ-O-Framer you can assemble them economically and accurately. And its price to fit your budget today.

OUTSTANDING DESIGN FEATURES

- Ready to use upon arrival.
- It builds up to 20' stud walls.
- Height adjusts from 7' to 9'2".
- Triad stud locators 16" and 24", and color coded.
- Fast removal of wall by air operated rollers on each side.
- Leveling shoes on each leg.
- Rails and tool carriage along each side with no special mount required on hand tools, plus fast tool change bracket.
- Hand tools are adjustable for nailing 2x4 or 2x6 studs.
- Adjustable squaring stops for plate placement.
- It's made heavy to last under heavy use.
